## Governor Charlie Baker's GIC Is Guilty of Malpractice

Attend an emergency meeting with public employees and elected officials

Voice your concerns about changes to our health insurance

## **Tuesday, January 30 5 p.m.** Boston Teachers Union Hall 180 Mount Vernon St., Dorchester

With no input from working families affected by the decision, the Baker-controlled Group Insurance Commission voted to take away Massachusetts health insurance carriers available to thousands of active and retired public-sector employees and push them toward an Indiana-based company. Next, the GIC will be making decisions that will affect how and where you receive health care and how much it costs. *We must act now!* 

## **Our goals:**

- To have Governor Baker's GIC rescind its decision to eliminate insurance plans offered to active and retired public employees.
- To have Governor Baker's GIC freeze out-of-pocket costs and prevent any changes to access to hospitals, doctors or benefits.
- To gain legislative support for the public employee-backed bill that increases labor's representation on the GIC, improving transparency in the decision-making process.
